Chronic Obstructive Pulmonary Disease (COPD) is highly prevalent and it affects the patients' quality of life by its marked influence on respiratory and non respiratory function. Despite the increasing attention to COPD, its severity is underestimated. One reason of this underestimation is the low levels of adherence to treatment. We conducted a study to assess

adherence to treatment and the motivation that patients have for their treatment in a Colombian medical center. We prospectively collected data from 140 COPD patients of a multidisciplinary medical team. We recorded adherence, comorbidities, use of glucocorticosteroids, Chronic Obstructive Pulmonary Disease Assessment Test (CAT), and the dyspnea scale. At the time of study, 55 patients were being treated with inhaled glucocorticosteroids. Patients had a mean age of 58.1±8.2 years; 97.1% were male; mean CAT score was 28.6±7.8; mean dyspnea score was 4.2±0.6; 80% of patients had moderate to very severe COPD. Adherence (40%) was lower than the ideal level of 70%. CAT score and dyspnea scale were correlated with

DHW is the first medical journal to have its own medical journal website. We aim to provide a central, searchable, professional, and reliable destination for the latest medical news in the digital age. The journal is focused on publishing only peer-reviewed articles that are consistently high-quality (peer-reviewed) and scientifically sound (journal articles); the journal is not a general electronic medical journal. Focused on publishing original research (research articles), Perspectives (views of thought leaders), Short Reports (note of note), Practice Updates, Viewpoint, Correspondence, Quill Articles and Perspective (reflections), DHW strives to bring together digital and print medical publishing to serve readers who crave quality, sound science and don't want the fluff that has traditionally characterized many medical journals. We look forward to serving you! Discover DHW and all it has to offer. Surgical Tractography (SurgiT) is a program created to help members of the Society of American Gastrointestinal and Endoscopic Surgeons (SAGES) train and better understand surgical endoscopy in general

and more specifically SEMS procedures. The tool is a 3D representation of a small bowel endoscopy, created from the pre-stent, post-stent and post-intervention CT scanning. Multiple procedures, such as placements of lumen-apposing stents (covered, uncovered and ring), stone extraction and suturing, etc. can be simulated and reviewed by SAGES members. Advancements in technical medical imaging and the ever increasing number of therapeutic procedures, which include the ever increasing number of stent applications, places an increasing burden on the technical medical imaging department and the radiologists to answer the question, "What am I going to do with this?" This program allows the user to explore treatment planning from the point of view of the radiologist. Once the procedure has been planned, this program uses the workflow set-up, user input, and the simulated images and the

Reviews of VideoDude PCWorld VideoDude: an uninspired 'director' after whom a billion video files are named It's hard to say which is more embarrassing: the fact that VideoDude is such a boring app, or the fact that some of you are buying it. Even the name is boring. Of all the neologisms that crop up in the world of business applications, "video-dude" is really not one of them, which is even more ironic since VideoDude apparently tries to do exactly what it says it does. But it's also not a clever name, so few of you want to watch its cheesy video ads, and that's odd because it's among the most useful business applications in the App Store--and also one of the least popular. If you're looking for a video editor, AudioMile's FastTrack is a good choice. It costs a bit more, though, and has
